DETAILED ACTION

Allowable Subject Matter

Claims 1-58 are allowed.

The following is an examiner's statement of reasons for allowance: ✓

As for claims 1, 16, 29, and 40, the prior art fails to teach or disclose a flashlight with a plurality of different light source operating modes, detecting entry of a plurality of input codes through a momentary contact where each input code identifies a respective one of the plurality of light source operating modes; and activating and deactivating a light source of the flashlight through a single respective activation of the momentary contact in each of the plurality of operating modes without changing the operating mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Parsons et al. (US Pat 6190018) and Bruwer (US Pat 6621225) disclose switching systems used in flashlights.
